

Philosophy Statement

I practice the educational philosophy and method of Dr. Maria Montessori, and I am dedicated to the goal of providing excellence in education in the tradition of the Montessori philosophy. I believe that the Montessori is an aide to a child's natural development.

My belief is that childhood is a happy and vibrant period of life when children are naturally motivated to investigate and explore phenomenon around them.

It is my sincere concern and desire to make every effort to provide a classroom environment in which each child may develop according to his or her own individual abilities, and needs.

My aim is to provide a loving and healthy atmosphere, where children may learn at their own pace, the fundamentals of democratic living, self-reliance and understanding, develop good habit, and progress mentally, physically, spiritually and socially.

Additionally, as an educator, I work closely with parents. I believe that home and school need to work closely together in order to help educate our citizens of tomorrow, so that their world may be a more peaceful, and happier place. I am determined to accept all children regardless of sex, religion, race, nationality, or special needs.

Mrs. Kay
